**Date:** 27 February 2025

**Time:** 18:30 – 20:00

**Venue:** Virtually over Zoom

**Register to attend [here](#)**

## Read all about it

A lot of children who begin at a new setting can initially present as shy or quiet. In this session we will consider when children may require some further support to develop their communication skills. We will discuss and explore some useful strategies setting staff can implement and why these will have an impact on the children.

## Who is this training session for?

This session is suitable for all members of the children's workforce in the borough of Halton, who support children in early years and key stage 1 environments including Nursery Practitioners, Childminders, Teachers, Teaching Assistants, Early Help Officers, Members of the Health Visiting Team and such like.

## How is this session being delivered?

This one and a half hour **in person** training package is being delivered by one of Communicate SLT's Specialist Speech and Language Therapists at a venue to be confirmed at time of publishing this event.

You will receive a calendar invite and joining instructions in due course, after submitting a MS Form.
